

**IN THE SPECIFICATION**

Please amend the paragraph at page 11, lines 21 through 27, as follows.

2. The invention can be used independent of the speech-recognition function. Figure 10 illustrates a drive-up window 500 in a fast-food restaurant 505, wherein a driver (not shown) of an automobile 506 speaks to a two-dimensional microphone array 510 ~~340~~, shown also in Figure 11. The two-dimensional array 510 produces a three-dimensional pattern of lobes, represented by arrows AA in Figure 10, and in Figure 12, which is a top view.
